WORKSHOP VIII

The Regulation of Sleep

This Workshop was one of two held in Strasbourg in June 1999 as part of the celebrations for the tenth anniversary of the Human Frontier Science Program.

HFSP WORKSHOPS

The HFSP workshops were initiated by **Michel Cuénod** (*Secretary-General, HFSP*) with the support of the Board of Trustees and the Council of Scientists. The workshops, in English, are held in Strasbourg on specific scientific topics of particular timeliness in the two fields of research covered by HFSP: brain functions and biological functions at the molecular level. The guiding principles are general significance and novelty of the topic, treatment by leading experts, emphasis on discussion, and broad international, intercontinental and interdisciplinary representation. The reports, edited by the organizers, present the issues discussed in a format attractive to specialists, post-doctoral trainees and students.

The present report is based on a meeting held at the European Parliament in Strasbourg from May 31–June 2, 1999 as part of the 10th Anniversary celebrations of HFSP.

Acknowledgements

The proposal for the workshop came from **Alexander Borbély** (*Zürich*), **Osamu Hayaishi** (*Osaka*) and **Terry Sejnowski** (*La Jolla*) and the meeting was organized by them with the help of the HFSP staff.

Our thanks go to the four rapporteurs who wrote the initial reports of the talks given at the meeting:

Chiara Cirelli (*San Diego*): Obál, Adrien, Mignot, Tononi, Jouvet

Alain Destexhe (*Quebec*): Steriade, McCormick, Sejnowski, Berridge, McCarley

Paul Franken (*Geneva*): Maquet, Heller, Tobler, Gillette, Dijk

Marika Lancel (*Munich*): Achermann, Hayaishi, Krueger, Gillin

These reports and McNaughton's article were edited and the book produced by **Jennifer Altman** (*London*).

We thank **Muriel Rhin** (*Strasbourg*) for technical support at the meeting, **Stuart Molloy** (*Resolution Design Ltd, London*) for the artwork, **Alissa Surges** (*Ann Arbor*) for compiling the bibliography, **Solange Metzger** (*HFSP, Strasbourg*) for her indispensable support in administration and production and the staff of Valblor, Illkirch for their patience and cooperation.

PART I - THE NEUROPHYSIOLOGICAL BASIS OF SLEEP

Introduction	27
Neuronal substrates for short-term plasticity during sleep oscillations in corticothalamic networks (<i>Mircea Steriade</i>)	30
Dynamic properties of thalamocortical activity (<i>David A. McCormick</i>)	45
Computational neurobiology of sleep rhythms (<i>Terrence J. Sejnowski</i>)	57
Calcium signalling systems in neurons: synaptic plasticity and sleep (<i>Michael J. Berridge</i>)	65
Topography of the sleep EEG in humans: power and coherence analysis (<i>Peter Achermann</i>)	75
Functional neuroanatomy of normal human sleep (<i>Pierre A. A. Maquet</i>)	86
Discussion	93

PART II - NEUROCHEMICAL AND MOLECULAR APPROACHES TO THE REGULATION OF SLEEP

Introduction	95
Regulation of sleep by prostaglandin D ₂ and adenosine (<i>Osamu Hayaishi</i>)	97
Adenosine and 5-HT as regulators of behavioural state (<i>Robert W. McCarley</i>)	103
The role of growth hormone-releasing hormone in sleep regulation (<i>Ferenc Obál Jr</i>)	112
Cytokines and growth factors in sleep regulation (<i>James M. Krueger</i>)	122
The regulation of REM sleep by 5-HT and its relationship to endogenous depression (<i>Joëlle Adrien</i>)	131

Pharmacological studies of 5-HT and sleep in humans (<i>J. Christian Gillin</i>)	140
Pathophysiological and genetic studies of the sleep disorder narcolepsy (<i>Emmanuel Mignot</i>)	148
Molecular correlates of sleep, the awake state and sleep deprivation (<i>Giulio Tononi</i>)	155
Discussion	165

PART III - SLEEP AS A REGULATED AND REGULATORY SYSTEM

Introduction	169
REM sleep as a genetic programming system for psychological individuation (<i>Michel Jouvet</i>)	171
Neurophysiological evidence for reactivation of the memory trace during sleep (<i>Bruce McNaughton</i>)	179
The development of sleep and sleep regulation in the rat (<i>H. Craig Heller</i>)	187
Daily torpor, a sleep-deprived state (<i>Irene Tobler</i>)	195
Cellular regulators of circadian timing (<i>Martha U. Gillette</i>)	203
A circadian perspective on human sleep-wake regulation and ageing (<i>Derk-Jan Dijk</i>)	212
